PARKS

Parco Ciani

The Ciani Park is Lugano's green pearl. Located near the historic centre and fronting on Lake Ceresio, it covers a surface of 63,000 square meters. The park is decorated with paths shaded by century-old trees that wind around flower beds, velvety green lawns and small squares that invite you to take a rest. Sculptures and fountains decorate the paths. The park is frequented by locals and tourists alike who admire the colorful flowers, the rare, majestic and exotic species of trees, and the interplay of light and shade created by the vegetation. The Villa Ciani is also a spectacular sight.

CITIES & MONUMENTS

Lugano's historic centre

The Piazza della Riforma claims Locarno's Piazza Grande role of Ticino's most beautiful square. It's considered the city's elegant "living room" surrounded by old buildings including the Neoclassic Palazzo Civico (Town Hall) and inviting places to take a break. Meeting point for Lugano residents (the luganesi), it hosts numerous events and is the ideal starting point to visit the city. A network of narrow pedestrian streets, where one strolls among glittering shop windows and luxurious boutiques, connects it to the main points of interest in the centre (S. Lorenzo Cathedral, church of S. Maria degli Angioli, LAC, lakefront).

TREKKING

Locarno Lakeside Promenade

During springtime, lawns that run along the Locarno Bay transform into a multitude of colours and the lakeshore is seized by tourists on a quest to find the sun. Leaving the Locarno pier to the South, in about 15 minutes you reach the Parco delle Camelie (Park of the Camellias). Presenting about 1000 varieties of this same plant, it offers a spectacular scene of flowers in bloom over a period of 9 months, but especially between March and April. If you go in the opposite direction from the pier, a pedestrian street along the lake leads you to Tenero through Rivapiana, where old and well-preserved fishermen's houses still stand.
