

TREKKING

Bavona Valley

Bavona Valley, which branches off from the Maggia Valley, is characterized by its wilderness. To this day it is deprived of electricity (except in San Carlo) and populated only during the summer. The magic of nature combined with the work of mankind has bestowed peace and harmony to this valley, one of Ticino's most beautiful. Consisting of extremely high cliffs and remains of colossal landslides it is also one of the steepest and rockiest valleys of the entire Alpine region. An enchanting walk that goes through twelve villages, including Foroglio with its spectacular waterfall, allows the visitor to appreciate its charm.

VILLAGES

Rasa

It is difficult to escape Rasa's charm, in the Centovalli Valley. The calm of the village, located at 900 meters and accessible only on foot or via the cable car mounting up from Verdasio, the harmony of its stone buildings and the silence that lingers in the lovingly cared-for vegetable gardens and yards are what make this a very special place. Surrounding the little church dedicated to Saint Anne stand old rural and noblemen's homes. A stop at the grotto (tavern) is a must before going back with the cable car or before descending on foot to the beautiful village of Palagnedra, through the old hamlet of Bordei.

WATER

Lakes of St. Gotthard

The excursion to the lakes of St. Gotthard is truly fascinating due to many magnificent pools of water in which the sky and the mountains are reflected with spectacular scenic effects. The significant height is the reason why summer and early fall are the best periods for a hike. The walk is not difficult but still requires a little training and the right equipment. Along the route, which starts from the top of the St. Gotthard Pass (2091 m), you will come upon the shimmering blue or emerald waters of the lakes, stirred by breezes that ruffle the surface, a truly stunning mesmerising sight!
