

TREKKING

Gandria Trail

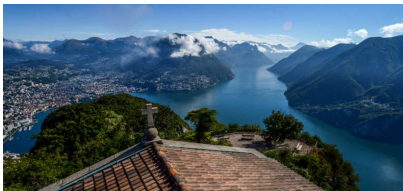

The *Sentiero di Gandria* (Gandria Trail) is a "must" for those vacationing in the Lugano Bay. It is a trail that runs along the lake framed by natural beauty, with an incredible panorama on the lake and surrounding mountains. Tranquility and silence characterize this walk that unfolds through typically Mediterranean flowers and shrubs on the way to one of Ticino's most charming villages. A detour from the main trail leads to the "Parco degli ulivi", with century-old olive trees and educational panels that illustrate the history and characteristics of the plants.

SCENIC VIEWS

Monte San Salvatore

"You must have personally been up here if you want to have an idea of its grandiosity and magnificence, and only then will this moment become one of the most beautiful and unforgettable ones of your life". With these words, the German landscape philosopher C. C. Lorenz Hirschfeld described the profound emotion he felt when faced with the 360° view of Lake Lugano, the city and the Alpine chain that can be enjoyed from numerous panoramic positions on San Salvatore's summit. This mountain, symbol of the Bay of Lugano, is easily accessible with a funicular that leaves from Paradiso.

TREKKING

Tibetan Bridge of Curzútt

This four-hour walk in the hills along the right bank of the Ticino River, in the region facing the Magadino Plain, does not only offer a beautiful scenery, but also boasts several points of interest. The thrill of crossing one of the longest Tibetan bridges in Switzerland (270 metres); the discovery of the Romanesque church of San Bernardo, featuring a number of beautiful frescoes of 14th and 15th century; a visit to the old and beautifully restored housing cluster of Curzútt, testifying to the time when daily life mainly revolved around hillside activities.
