

SCENIC VIEWS

Monte Generoso

Monte Generoso is probably the most panoramic mountain in the Canton of Ticino. For over 125 years, visitors have been accessing its summit via a cogwheel railway. After reaching an altitude of 1,704 metres, you can enjoy a breathtaking view over Lake Lugano and the Alps. The view stretches from the Gran Paradiso to Monte Rosa, from Cervino to the Jungfrau, from the Gotthard mountain range to that of Bernina. Perched on top is the spectacular "Fiore di pietra" (Stone Flower) complex, designed by Swiss architect Mario Botta. Inaugurated in Spring 2017, it houses two restaurants and a panoramic terrace.

EXPERIENCE

Swissminiatur

At Melide's Swissminiatur, close to Lugano, you can visit Switzerland... in an hour. In the short while, enough for a walk in a blossoming park with over 1500 plants, you can admire the Swiss Confederation's most representative monuments and places: castles, historic buildings, churches, cathedrals, squares, rustic houses, railways, mountains and lakes. Everything rigorously rebuilt in a 1:25 scale. The outdoor museum offers, on a 14,000 square meter surface, over 120 miniature models and a dense railway network with 18 trains and 3,500 meters of tracks.

CITIES & MONUMENTS

Castles of Bellinzona

The castles of Bellinzona are one of Ticino's main attractions and, with the old walls that are still standing, are the sole medieval military complex in the Alpine region. They became part of the UNESCO World Heritage in 2000. A visit to the castles, also connected by a tourist train, is like diving into history: an excursion enjoyed by all ages thanks to the splendor of the fortifications with their high towers and crenulated walls. Of interest is also the walk inside Bellinzona's historic centre, especially on Saturdays, when you can see the local market. Audio guides are also available.
