

PARKS

Park of the Breggia Gorge

An excursion in the Park of the Breggia Gorge is an authentic journey through time. In the Mendrisiotto region, along the river Breggia, one can observe exceptional geological contents. Thanks to the river's natural excavation activity a geology profile has been brought to light covering the period between the Jurassic and Tertiary, dating back 80 million years! Within these rocks are live testimonials of ancient seas: fossils, remains of underwater landslides and signs of climatic changes that took place before the appearance of humankind on Earth.

SCENIC VIEWS

Monte Bar

One of the most spectacular views of the Greater Lugano area, comprising a series of urban conglomerates, can be seen from Monte Bar. From the top, the view stretches from the Gulf of Lugano to the green interior of the Val Colla valley, with the metropolis of Milan silhouetted in the distance, and from the Rhaetian, Valais and Bernese Alps, to the Monte Rosa massif and the Apennines. The summit is easily accessible by a steep but pleasant two-hour walk through fields and woods, starting from Corticiasca in Capriasca. At the foot of the peak, you will find a welcoming mountain hut, where you can sample an array of specialities from the Ticino area.

VILLAGES

Ascona

Ascona is refined, picturesque, elegant and romantic. The historic centre's pedestrian alleys are swarmed with boutiques, restaurants, art galleries and antique stores. The lakeside promenade, recalling a fishermen's village of the past, is today a holiday paradise for those in the pursuit of a "joie de vivre". Ascona is also the birthplace of Giovanni Antonio Serodine, one of the greatest Italian painters of the 1600s. Some of his most precious works are kept in the city. From the 1900s, Ascona was at the crossroads of the Central European culture thanks to the presence of intellectuals and artists.
